

1. **Concerning your RFP - Support for Public Communications of Selected Business Environment Reforms, could you please clarify what is exactly understood as the „similar work“ in „Offerors must include 3 past performance references of similar work“ in the section 3.2 Technical Proposal, Part 3: Corporate Capabilities, Experience and Past Performance?**

Namely, we presume that this does not include work directly related to Construction Permitting or Inspection Oversight, but does it include working with public sector institutions, NGO's, projects similar to BEP, or „similar work“ has some broader meaning?

This work does not presume previous experience in the Construction permitting and Inspections area. It presumes projects of the social value, i.e. working on the Projects with the NGOs, state institutions, projects that had impacts on the society as a whole, etc.
